

APPENDIX A: ONE-PAGE BRD FOR CLICKABLE PROTOTYPE MVP

Ethos Community™ CaaS Platform | Kushian™ Sudan Pilot | Founder: Dr Hatim El Tahir

Purpose	Create a polished clickable web-app prototype for the IsDB Group Innovation and Startups Pitch Competition. The prototype should demonstrate how Ethos Community™ connects diaspora supporters, displaced families, students, women professionals, healthcare cases and SME recovery services through Kushian™.
Prototype scope	Demo-only web app. No live payments, lending, remittance, insurance underwriting, medical diagnosis or regulated financial services. Use mock data, simulated pledge/support flows and partner-enabled referral language.
Target users	1) Diaspora supporters in GCC, UK, Europe and USA. 2) Displaced families and students. 3) Women and graduates seeking CPD, mentorship and jobs. 4) Relocated Sudanese SMEs. 5) Admin/impact team.
Core verticals	Education, CPD and Mentorship Healthcare and Medical Takaful Partner Access Purpose-Linked Family Support Women Empowerment and Workforce Readiness SME Recovery Finance and Advisory Legal/Professional Services Impact Dashboard.

Required clickable screens

1. Landing page Ethos Community™ proposition, Kushian™ pilot, service vertical cards, CTA buttons: Support a Case, Find Services, View Impact.	2. Supporter dashboard Persona examples: Dr Sarah, Professor Osman, Khalid, Hassan. Show family/student/health support cases and simulated purpose-linked support status.
3. Beneficiary profile Family/student/SME profile, location, needs, verification status, document checklist, request support buttons.	4. Education & mentorship CPD, mentor matching, employability training, credential/document vault, student and graduate support journey.
5. Healthcare & Takaful Partner-enabled medical support, clinic/provider directory, hospitalization support request, cooperative/Takaful referral workflow.	6. SME advisory Use cases: Ibrahim audit practice UAE, Ali restaurant Riyadh, Atif grocery Doha, Dr Afaf dental clinic Sharjah, Sami & Sami Sudanese products trading.
7. Impact dashboard KPI cards and charts: supporters, beneficiaries, women supported, students onboarded, healthcare cases, SMEs advised, countries served, simulated support flows.	

Build guidance and acceptance criteria

Preferred tools	Lovable for fast demo web app generation; Figma for polished clickable visual screens; optional Bubble/Softr if deeper portal/database workflows are needed.
UX style	Clean development-finance look; warm professional palette; simple navigation; mobile-responsive; rounded dashboard cards; demo watermark/footer.
Deliverables	Prototype link, 7 screenshots, short user journey map, mock dashboard, and exportable images for the IsDB appendix.
Acceptance criteria	A non-technical judge can understand the problem, users, service verticals, support journey, partner-led service model, and measurable impact in under 3 minutes.
Compliance wording	Footer must state: Prototype for demonstration only. Future financial, insurance, healthcare and payment services will be delivered through licensed partners subject to applicable laws and approvals.

Founder context: Dr Hatim El Tahir brings Islamic finance, governance, Takaful, capital markets, professional education and development-advisory expertise, including former Deloitte Islamic finance leadership, AAOIFI Ethics and Governance Committee participation, IIFM Sukuk Working Group participation, CISI IFQ accredited training and curriculum-development contributions.
